

Interstate 5 (I-5) Transportation Concept Report (TCR)

Public Workshops

The California Department of Transportation (Caltrans), District 2 will host a number of public workshops regarding the I-5 TCR. The purpose of these workshops is to provide the public the opportunity to discuss the future needs and development opportunities of I-5.

Some of the issues to be addressed during the workshops include traffic conditions, population trends, community demographics, land use, transportation of goods, environmental issues, transit services, and bicycle and pedestrian facilities.

Caltrans welcomes any suggestions or comments the public may have regarding the proposed TCR. Representatives from Caltrans will be available to take comments or answer questions. There will be a short formal presentation. Comments or questions may be registered at the meeting, by telephone, or by mail. Written comments should be sent to the California Department of Transportation, Attention: Kathy Grah, Office of System Planning, P.O. Box 496073, Redding, CA 96049-6073. Or contact Kathy at (530) 225-3236 or kathy_grah@dot.ca.gov.

We look forward to discussing the future of I-5.
